**CATTLE ORIGIN/US RESIDENCE- AFFIDAVIT**

In order to meet specified export requirements for some countries, USDA AMS requires National Beef to verify the origin or length of US residence for all cattle slaughtered. The signer of this feedlot affidavit attests that all cattle (through first-hand information, normal business records or producer affidavits) at your feedlot procured by National Beef meet one of the following requirements:

- All cattle are born and raised in the US.
- Cattle legally imported from Mexico and/or Canada have resided in the US for a minimum of 100 days.

By signing this affidavit, the signer attests that records concerning these requirements are available for review by National Beef for a minimum of 1 year.

This affidavit is updated annually by each feedlot in which National Beef procures cattle from.
